CONTENTS

Special Issue: New Insights into the Molecular Structure of Biological Systems

Preface ..... *ix*

Structure of enzyme-bound substrates: resonance Raman and kinetic evidence for differential enzyme–substrate contacts in *N*-(pentafluorobenzoyl)glycine dithioacyl and thioacyl papain
H. Lee, R.H. Angus, A.C. Storer and P.R. Carey (Ottowa, Ont., Canada) 1

Some structural aspects of protein–nucleic acid recognition point mechanisms involving amino acid carboxylic groups
N.V. Zheltovsky, S.A. Samoilenko, I.N. Kolomiets, I.V. Kondratyuk and M.I. Gubaidullin (Kiev, U.S.S.R.) 15

Resonance Raman characterization of heme Fe(IV)=O groups of intermediates of yeast cyctochrome c peroxidase and lactoperoxidase
C.M. Reczek, A.J. Sitter and J. Terner (Richmond, VA, U.S.A.) 27

DNA structure studies by resonance Raman spectroscopy
P.-Y. Turpin, L. Chinsky, A. Laigle and B. Jollès (Paris, France) 43

Conformational analysis of long acyl chains in solid and liquid thin films: polarization and decomposition of the ν (CH) Raman band
M. Harrand (Reims and Paris, France) 71

The interfacial structure of phospholipid monolayer films: an infrared reflectance study
R.D. Hunt, M.L. Mitchell and R.A. Dluhy (Columbus, OH, U.S.A.) 93

In vivo Raman spectroscopy of human, animal and artificial ocular lenses
A. Bertoluzza, C. Fagnano, C. Caramazza, E. Barbaresi and S. Mancini (Bologna, Italy) 111

Vibrational analysis of crystalline triglycine
T. Sundius, J. Bandekar and S. Krimm (Ann Arbor, MI, U.S.A.) 119

The conformation of dynorphin A-(1–13) in aqueous solution as studied by Fourier transform infrared spectroscopy
W.K. Surewicz and H.H. Mantsch (Ottawa, Ontario, Canada) 143

Towards a unified concept of oxygen activation by heme enzymes: the role of the proximal ligand
P. Anzenbacher (Prague, Czechoslovakia), J.H. Dawson (South Carolina, U.S.A.) and T. Kitagawa (Okazaki, Aichi, Japan) 149

Molecular structure of two gastrokinetic compounds, cisapride and R53757: comparison with dopaminergic D_2 antagonists
S. Collin, D.P. Vercauteren, G. Evrard and F. Durant (Namur, Belgium), J.P. Tollenaere and H. Moereels (Beerse, Belgium) 159

Structural aspects of Group I metal ion–nucleoside interactions
T. Theophanides and J. Bariyanga (Montreal, Quebec, Canada) 177

Conformational transitions of nucleic acids studied by IR and Raman spectroscopies
E. Taillandier, J. Liquier and M. Ghomi (Bobigny, France) 185

New insights into the phase behavior of a complex anionic amphiphile: architecture and dynamics of bacterial deep rough lipopolysaccharide membranes as seen by FTIR, X-ray, and molecular modelling techniques
D. Naumann, C. Schultz, A. Sabisch, M. Kastowsky and H. Labischinski (Berlin, Germany) 213

Raman study on a model system for the interaction of proteins with nucleic acids: lysine–tyrosine–lysine and polyriboadenylic acid
H.J. Himmler and H.H. Eysel (Heidelberg, F.R.G.) 247

Photoisomerization in bacteriorhodopsin studied by FTIR, linear dichroism and photoselection experiments combined with quantum chemical theoretical analysis
K. Fahmy, F. Siebert and M.F. Großjean (Freiburg, i.Br., F.R.G.) and P. Tavan (Garching, F.R.G.) 257

Photoisomerization in bacteriorhodopsin studied by FTIR, linear dichroism and photoselection experiments combined with quantum chemical theoretical analysis
K. Fahmy, F. Siebert and M.F. Großjean (Freiburg, i.Br., F.R.G.) and P. Tavan (Garching, F.R.G.) 257

Picosecond time-resolved resonance Raman spectrum of the K-590 intermediate in the room temperature bacteriorhodopsin photocycle
T.L. Brack and G.H. Atkinson (Tucson, AZ, U.S.A.) 289
Pressure effects on the Raman spectrum of proteins: stability of the salt bridge in trypsin and elastase
L. Heremans and K. Heremans (Leuven, Belgium) 305
UV photoelectron and quantum mechanical characterization of DNA and RNA bases: valence electronic structures of adenine, 1,9-dimethylguanine, 1-methylcytosine, thymine and uracil
S. Urano, X. Yang and P.R. LeBreton (Chicago, IL, U.S.A.) 315
Fourier transform infrared spectroscopic studies of lipids, polypeptides and proteins
M. Jackson, P.I. Haris and D. Chapman (London, Gt. Britain) 329
